Volume 24

Alsmeyer, G., On the moments of certain first passage times for linear growth processes (1)109–136
Attia, F.A., The control of a finite dam with penalty cost function: Wiener process input (2)289–299
Boldrighini, C., A. De Masi, A. Pellegrinotti and E. Presutti, Collective phenomena in interacting particle systems (1)137–152
Bolthausen, E., Markov process large deviations in τ-topology (1) 95–108
Borkar, V.S., A comparison principle for certain convex functionals of a diffusion process without drift (2)245–248
Bryc, W., Trajectories of Gaussian processes and interpolation of Banach spaces (2)257–263
Burkhardt, G. and U. Küchler, The semimartingale decomposition of one-dimensional diffusions with natural scale (2)237–244
Csáki, E. and A. Földes, A note on the stability of the local time of a Wiener process (2)203–213
Csörgő, M., L. Horváth and P. Révész, Stability and instability of local time of random walk in random environment (2)185–202
Daley, D. J., Certain optimality properties of the first-come first-served discipline for G/G/s queues (2)301–308
Galambos, J. and A. Obretenov, Restricted domains of attraction of EXP($-e^{-x}$) (2)265–271
Galves, E. and E. Presutti, Travelling wave structure of the one-dimensional contact process (1)153–163
De Haan, L. and S. Resnick, On regular variation of probability densities (1) 83– 93
Heyde, C.C., On combining quasi-likelihood estimating functions (2)281–287
Horváth, L., On the tail behaviour of quantile processes (1) 57– 72
Hüsler, J., Minimal spacings of non-uniform densities (1) 73– 81
Joyce, P. and S. Tavaré, Cycles, permutations and the structure of the Yule process with immigration (2)309–314
Kesten, H., Hitting probabilities of random walks on Z^d (2)165–184
Léonard, C., Large deviations and law of large numbers for a mean field type interacting particle system (2)215–235
